Abel Tiruneh

Hawassa, Ethiopia
+251 967 472 569 abeltiruneh2468@gmail.com linkedin.com/in/abel-tiruneh github.com/AbelXeon portfolio

4th-year Computer Science student and full-stack developer with hands-on experience building web applications using Laravel, React, and Django. Comfortable across the stack, from database design to responsive front-end interfaces.

Education

Infolink University College **Expected 2027**
Bachelor of Science in Computer Science *Hawassa, Ethiopia*

Experience

Leykun Design and Software PLC **July 2026 – September 2026**
Full-Stack Developer Intern *Ethiopia*

- Worked as a Full-Stack Developer, building and maintaining both front-end interfaces and back-end functionality for company projects.
- Collaborated with the development team to implement new features, fix bugs, and improve existing codebases.
- Participated in the full software development lifecycle, from planning and coding to testing and deployment.

Projects

TutorLink | *Laravel, PostgreSQL* **2025**

- Built a monolithic web platform in Laravel connecting verified private tutors with students across Ethiopia for academic and programming support.
- Designed and implemented a PostgreSQL database schema to manage tutor verification, student-tutor matching, and session data.
- Developed core platform features enabling students to search, connect with, and book sessions with tutors.

Elroi Guest House | *Laravel, PostgreSQL* **2025**

- Developed a web-based guest house management system in Laravel to handle bookings, rooms, customers, payments, and daily operations.
- Built an organized staff dashboard to manage reservations, monitor room availability, and maintain guest records, reducing manual work.

Project RESONANCE | *Python, Groq, Deepgram* **2025**

- Built a personal AI assistant on Telegram supporting chat, voice notes, live web search, and a fully customizable personality.
- Integrated Groq for language model inference and Deepgram for voice note transcription.

AutoDoc.md | *Python, AI* **2025**

- Built a tool that generates instant, professional README files by pointing it at a codebase and letting AI handle documentation, styling, and architecture breakdown.

Nani | *Website* **2025**

- Developed a web application for a cake business, allowing customers to browse products and place orders online.
- Built a responsive front-end interface to showcase products and streamline the ordering experience.

Technical Skills

Languages: Python, PHP, JavaScript, Java, C++, HTML/CSS, SQL
Frameworks/Libraries: Laravel, React, Tailwind CSS, Flask, Django
Databases: MySQL, PostgreSQL, SQLite
Developer Tools: Git, GitHub, Blender, Linux (Ubuntu, Kali)

Certifications

Introduction to Cybersecurity – Cisco Networking Academy (Verified)

Linux Unhatched – Cisco Networking Academy (Verified)
